<div style="margin-bottom: 20px;">

<h1 class="title">Welcome Vehicle Damage Assessment </h1>

<p align="justify"><strong>Nowadays, a lot of money is being wasted in the car insurance business due
to leakage claims.

Claims leakage Underwriting leakage is characterized as the discrepancy between the actual payment of
claims made and the sum

that should have been paid if all of the industry's leading practices were applied.

Visual examination and testing have been used to may these results. However, they impose delays in the
processing of claims.

        The aim of this project is to build a VGG16 model that can detect the area of damage on a car.

```

The rationale for such a model is that it can be used by insurance companies for faster processing of claims if users can upload pics and

the model can assess damage(be it dent scratch from and estimates the cost of damage. This model can also be used by lenders if

they are underwriting a car loan, especially for a used car.

</p>
